

ABSTRACT

An external preparation comprising following ingredients

(A) and (B):

(A) a compound represented by the following general formula

(1)

wherein R<sup>1</sup> represents an organic residue having a cyclic structure that may have a substituent; R<sup>2</sup> represents a hydrogen atom or a lower alkyl group; and X represents an ethylene group or an ethenylene group or a salt thereof, and

(B) a monoterpene.

The external preparation of the present invention is excellent in percutaneous absorbability.
